## **Quattrocanali DSP+D Series**

4-Channel Fixed Installation Amplifier Platform with DSP and Dante™

Armonía-Plus System Manager

The Quattrocanali Series is specifically designed for installation applications. In just 1 RU, Quattrocanali offers smaller dimensions, lighter weight and the traditionally amazing sound quality and reliability of all Powersoft products.

Quattrocanali Series amplifiers implement a high efficiency microprocessor controlled power supply with built in PFC (Power Factor Correction) that allows flawless worldwide operation with any AC mains voltage in the range 90-264 VAC tolerant to peak up to 400 VAC. The patented SRM (Smart Rails Management) technology allows to maximize the efficiency of the

system and drastically reduce power consumption at any load and usage condition.

A secondary high efficient power supply is present to keep the system responsive at any operating condition, so that system check and monitoring can be performed even in stand-by and deep-sleep modes.

Quattrocanali Series is designed to work with lo-Z (from  $2\Omega$ ) and with 70V/100Vdistributed lines: any mixed configuration of low and high impedance output loads can be realized, making the Quattrocanali Series suitable to applications in installed audio systems.

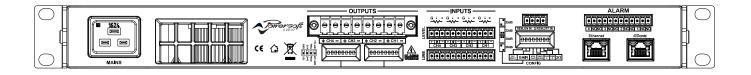

DSP+D versions of the Quattrocanali series extends system performance with the support of Dante™ digital audio networking architecture and the on board high-end signal processing.

- ► Small to medium-scale venues
- ► Main systems, central or distributed, subwoofers, hi-Z/lo-Z
- ► Mission critical applications
- ► Shops, stores
- ► Theatres, restaurant, and bars
- ► Houses of worship
- ► Convention centres
- ▶ Business centres
- ► Cruise ships
