

HD671 COMPOSITE MATERIAL CLOSED-BACK HEADPHONE

Simple, Light Weight, but Extraordinary

Description

This over-ear headphone with self-adjusting headband is equipped with a $\Phi 50\text{mm}$ dynamic driver and closed-back structure.

HD671 is simple and fashionable in design and super lightweight with a great fit. The HD671 features a low impedance and extraordinary sound quality even when connecting directly to smart phones.

HD671 is the most light contact pressure closed-back headphone in the world. Equipped with soft composite material earpads, HD671 delivers optimal fit and comfort as well as superior isolation.

The advantage of the composite material earpads

- The high flexibility and softness of the composite material earpads provides best-fit for the ears
- The composite material earpads significantly reduce sound leakage for the best listening experience with more powerful bass (HD671)
- High durability compared to the normal earpads
- Extraordinary noise reduction for excellent ambient noise isolation (HD671)
- Washable pads for easy cleaning
- The soft pads enable very long-time wearing
- Non-toxic design

Fitted material,
no bass leakage

High extension
High durability

Soft material for
ultimate comfort
with glasses

Low clamping force
under the same
isolation effect

Washable
material for easy
cleaning

Perfect isolation
for the cold wind

Features

- Dynamic closed-back headphone
- $\Phi 50\text{mm}$ precise composite diaphragm
- Light weight design
- Studio monitoring grade, precise and balance sound
- Robust structure design

Specifications

Driver	$\phi 50\text{ mm}$, neodymium
Frequency Response	20Hz-20kHz
Impedence	32 Ω
Sensitivity	95dB (1mW)
Connector	Gold plated 3.5mm stereo mini plug
Cable length	$\phi 3.5 \times 2.5\text{m}$
Headphone Caliper Pressure	3.5 N

PATENT PENDING
106213987全球专利
