**ACTIVE COAXIAL
 DESIGN STAGE
 MONITORS**

Starting from March 2016 LVX tour series is enriched

by LVX XM professional stage monitors. Available in two models, respectively equipped

with a 12" and a 15" woofer, LVX XM12 and LVX XM15 feature premium components and a unique coaxial horn design, delivering a powerful yet clear sound quality in spite of their compact design and raising the bar for intelligibility, definition and ease of use.

**ADAPTABLE
 TO ALL STAGE
 REQUIREMENTS**

LVX XM monitors feature an advanced DSP offering eight variable

presets in order to easily adapt to different stage requirements. The cabinets are constructed in sturdy plywood and comes with 2 integrated side handles allowing easy transport and stage set up operations. A pole mount cup on one side allow to put the system on a pole for vertical use.

**A NEW
 HORN
 DESIGN**

LVX XM's design enhance the benefits of coaxial horn wedge's concept.

dBTechnologies designed a horn that not only shape high frequencies' directivity, but also acts as a phase plug for the woofer, boosting and lighting up the vocal band, thanks also to the advanced DSP featuring FIR filters

processing. As a result, not only the horn contributes to deliver a bright audio performance with a uniform throw pattern, but it also reduces the overall dimensions of the system and protects the internal components, reinforcing the cabinet structure.
