

KMU-200

4K Multi-Channel Touch Screen
Region of Interest Switcher

Features

- Size and switch regions of interest from using the touchscreen
- 16:9 and 9:16 video streaming via the built-in encoder
- Camera control and cutouts selection by a joystick
- Four channel audio mixer and audio embedding
- One 4K splits into four Full HD channels.
- Joystick and Zoom knob for moving the cropped selection.
- Intuitive multi-touch gestures for controlling pan, tilt and zoom.
- Real-time video backup recording with a bitrate up to 16Mbps.
- Horizontal or Vertical video streaming designed specifically for social media applications.

Overview

The KMU-200 is a 4K Multi-Channel Touch Screen Region of Interest Switcher with built-in streaming & recording. It provides video productions with engaging camera angles in vertical or horizontal formats and high quality audio. The built-in encoder streams directly to popular CDN platforms such as Facebook, YouTube or Instagram in vertical or horizontal modes. Record your live events with built-in SD card recording.

The KMU-200's all-in-one design is similar to the DataVideo Hand Carried Studio line of switchers bringing switching, audio mixing, recording and streaming into a compact, portable system. Social media platforms are best viewed vertically using a smart phone, and vertical content returns the strongest user engagement. The KMU-200's workflow has both horizontal (16:9) and vertical (9:16) switching modes. Horizontal streaming is the current norm, however vertical video content is growing in popularity due to smart phones where most content is consumed in portrait mode.

A single 4K camera can be utilized to obtain four camera angles, plus a full-screen view. The extra HDMI input can be used for an additional camera or computer source.

Recommended Accessories

DataVideo:

- **PTC-280** 4K PTZ Camera
- **AD-100M** Audio Delay Box
